PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate with hands-on Business Analyst experience gained as a Business Analyst Intern at Arch Technologies. Comfortable working across the requirement lifecycle: gathering and documenting business requirements, mapping As-Is/To-Be processes, writing user stories and acceptance criteria, and translating stakeholder needs into clear specifications. Skilled in SQL, Python, and Power BI for data-driven analysis and reporting, with practical exposure to SDLC and Agile ways of working. Strong analytical thinking, attention to detail, and stakeholder communication, with a self-driven case study covering the full BA documentation cycle (BRD, FRD, user stories, use cases, and wireframes).

EDUCATION

Bachelor of Science: Computer Science

2023 – 2027

Muhammad Ali Jinnah University

EXPERIENCE

Business Analyst Intern (Remote)

July 2025 – September 2025

Arch Technologies

- Assisted in gathering and validating business requirements by collecting, cleaning, and reviewing data from multiple sources.
- Analyzed datasets using SQL, Python, and Excel to identify trends and support stakeholder decision-making.
- Built dashboards and reports in Power BI to communicate KPIs to business stakeholders.
- Conducted exploratory data analysis (EDA) to surface business improvement opportunities and inform recommendations.

BUSINESS ANALYSIS PROJECT

CRM Lead Management System (*Business Analysis Case Study*)

- Led an end-to-end BA case study for a real-estate CRM initiative: ran discovery, defined scope, and documented a full BRD covering business problem, objectives, and stakeholder analysis (CEO, Sales Manager, Sales Agent, Marketing Manager, CRM Admin).
- Mapped As-Is and To-Be process flows to show how automated lead capture, duplicate detection, and assignment would replace manual Excel-based tracking.
- Authored 10 functional and 5 non-functional requirements, 6 user stories with acceptance criteria, and 5 use cases covering lead creation, assignment, follow-up, and conversion.
- Designed low-fidelity wireframes in Draw.io for the lead list, lead creation, lead details, and sales dashboard screens.
- Defined 9 expected business benefits and outlined key assumptions and constraints to align scope with stakeholder expectations.

DATA PROJECTS

Retail Store Data Analysis (*SQL + Power BI*)

- Cleaned and analyzed retail data, building dashboards to surface sales trends and category performance for stakeholder reporting.

Netflix Content Analysis (*SQL*)

- Analyzed Netflix content by type, rating, year, and country to identify content and catalog patterns.

SKILLS

Business Analysis: Requirement Gathering, BRD/FRD Documentation, User Stories & Acceptance Criteria, Use Cases, Process Mapping (As-Is/To-Be), Stakeholder Analysis, SDLC, Agile/Scrum Basics

Languages: Python, SQL (PostgreSQL, MySQL)

Tools: Jira, Power BI, Draw.io, Balsamiq, Excel, Jupyter Notebook

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Core Competencies: Data Cleaning, EDA, Statistical Analysis, Data Visualization, Written & Verbal Communication

CERTIFICATIONS

- SQL Associate, DataCamp
- Exploratory Data Analysis, DataCamp
- Data Communication Concepts, DataCamp
- Machine Learning with Python – Cognitive Class, IBM
- AI Fundamentals, DataCamp
- Understanding Cloud Computing, DataCamp
